PRICE LIST OF CACTI AND SUCCULENTS--

MARCH 1946 No. 1

Terms; All orders of \$1.00 and over will be shipped post paid except on specimen sized plants. All specimen sized plants are priced F.O.B. Our nursery, San Francisco. Ten cents extra for all orders less than \$1.00 to cover shipping costs. All foreign shipments are Express Collect. When consular invoices are required customers must forward them with shipping permits at time order is placed. California customers please include 2 1/2 % State Sales Tax.

We do not substitute on orders unless directed to do so by the customer at time orders are placed. If plants ordered are out of stock we will do our best to secure them for you.

MAMMILLARIA--

albescens: This species is similar to the "Birds nest" but without the wool and has occasionally one long central spine. Flowers are of a high tone greenish white. 25¢ to 50¢

bocasana: The "powder puff" is a splendid species, both for show and bloom. Has long white hair that almost completely hide the short hooked spines. Flowers are light reddish brown with greenish yellow margins. 25¢ to 50¢

camptotricha: The "Birds nest" is a very popular plant with long deep green tubercles and 4 to 6 radiate spines that curve around the plant. The spines become a shell white with age. Flowers white with a trace of green. 25¢ to 50¢

candida: A very attractive pale green, globular body that is almost entirely hidden with fine white spines. Flowers are of a muddy rose with whitish margins. A must have. 25¢ to 65¢

celesiana: Body simple, globular to cylindric, of a bluish green and covered with many small whitish radiate spines and 4 to 6 centrals. Flowers rose to a fiery carmine. Makes a lovely specimen plant. 25¢ to 75¢ each.

compressa: This grand species forms a large many headed cluster covered with white spines and white wool in the top. Flowers purplish pink with a lighter pink mid-stripe. A real favorite. 35¢ to 75¢

elongata: "Tady fingers" seems to become this species for its long finger like body covered with long golden red spines. Flowers are of a greenish yellow with a faint pink mid-stripe. 25¢ to 50¢ Clusters 85¢ to \$1.50

fragilis: A bright green body covered with white harmless spines. This is a very interesting little species that makes many offsets each year. Each little offset will grow and make many new plants. 10¢ to 25¢ each.

kissinginia: A lovely white globular plant with dense white spines and white hair in the flowering top. Flowers are a delicate rose. A good bloomer. 25¢ to 75¢

Kewensis: A firm grayish bluish green globular body with lots of white wool in the crown. Flowers from March to Oct. of a deep purplish pink. 25¢ to 75¢

Lloydii: A very handsome globular plant with short star like spines on 4 angled tubercles. Has lovely reddish brown flowers with darker redish mid stripe. 25¢ to 50¢

magnimamma: A large cluster forming plant, a grayish green globular body with 3 to 5 highly colored radiate spines. The lower spine is recurved to the body. Flowers are creamy white with red mid-stripe. 35¢ to 75¢

mazatlansis: A grayish green globular to cylindric body that bears tanish wool in the crown of the new growth. Flowers are carmine red with brownish mid-stripe. 25¢ to 45¢

MAMMILLARIA

parkinsonii: The "Owl's eye" is a remarkable species that splits with age to form 2 or more heads that resemble big round owl's eyes. The bluish green globular body is covered with white spines with dark tips on the centrals. A free flower and very attractive. 25¢ to 75¢

plumosa: The only plant that has "Feathers in place of spines. Yes this attractive bluish green nipped Cactus bears little feather like spines that are soft and harmless. A real gem in any collection. Flowers are of pale yellowish green with whitish margins. 25¢ to 1.00 each.

pyrrhocephala: A candelric dark green body covered with short reddish brown radial spines and white wool in the apex. Flowers deep pink with light pink margins. 25¢ to 50¢

sonorensis: Body of dull bluish green, globose, spines are reddish brown with white wool in the apex. Flowers from March to Nov. of deep pink. 25¢ to 50¢

woodsii: An attractive dull leaf green, globose plant with long dark spines that protrude from white wool around the top. Flowers early in March of dark pink with light pink edging. This is truly a very lovely specimen. 25¢ to 75¢

NOTOCACTUS

leninghausii: The "Golden ball" is a remarkable species with bright golden spines and even brighter golden yellow flowers. A very popular plant. 25¢

mammulosus: A free flowering bronze green globular plant with thick stiff dark spines. This is one of the lovely bright yellow species with a crimson stigma. Truly a very showy plant even when not in flower. Likes a dry winter. 25¢ to 75¢

ottonis: One would have to see these plants to appreciate them for they are hard to describe especially when in flower. They are of a globular body with sparse dark spines. The flowers are of a delicate deep lemon yellow with lighter yellow stamens set off with a bud red stigma. 25¢ to 50¢

scopa: Another of these beau-idea's. Globose green body covered with white bristles, some are longer tipped with red. A very handsome and desirable species. 25¢ to 50¢

NYCTOCEREUS

serpentinus: No collection is ever complete without this heavenly scented snake like plant. The body is of dark green covered with short spines. A fast grower and prolific bloomer. Flowers at night, satiny white and the most heavily scented of all. small plants 25¢ Flowering size \$1.75

ASTROPHYTUM

asterias: This is a very odd round, flat, bronze green plant that resembles the "Sea urchin" with its star shaped top dotted with little white spots. Flowers are bright yellow with red throats. All blooming sized plants. 2 to 3" 75¢ 3 to 4" 1.50

myriostigma: The "Bishops cap" is a lovely spineless 5 sided dark green plant with minute white star shaped dots all over. Flowers are bright yellow. 25¢ to 50¢

ornatum: This lovely and striking species is of a bronzy green thickly mottled with white star like dots. Heavily ribbed with straight spines nestled in cottony areoles. Flowers yellow with red throat. 25¢

capricorne: One of the more rarer species that is similar to the (ORNATUM) except they have a soft spine that curves around the plant. Flowers are red and yellow. 40¢ to \$1.00

Parthenocarpus: The "eye" is a remarkable feature that is often seen to form a or more heads that resemble the big round eyes. The "eye" is green and is covered with white spines with dark tips on the center. A free flower and very attractive. 25¢ to 50¢

Parthenocarpus: The only plant that has "flowers" in place of leaves. You can see attractive "green" and "white" flowers. A free flower in any position. The "eye" is of pale yellowish green with whitish margins. 25¢ to 50¢ each.

Parthenocarpus: A free flower. Dark green body covered with short reddish brown "spines" and white "spines" in the apex. "flowers" deep pink with light pink margins. 25¢ to 50¢

Parthenocarpus: Body of "eye" is green. "spines" are reddish brown with white "spines" in the apex. "flowers" from light to deep of deep pink. 25¢ to 50¢

Parthenocarpus: An attractive "eye" is green. "spines" are dark green that protrude from white "spines" around the top. "flowers" are in the center of dark pink with light pink edging. This is truly a very "eye" specimen. 25¢ to 50¢

NOTOCYTUS

Parthenocarpus: The "eye" is a remarkable feature that is often seen to form a or more heads that resemble the big round eyes. The "eye" is green and is covered with white spines with dark tips on the center. A free flower and very attractive. 25¢ to 50¢

Parthenocarpus: A free flower. Dark green body covered with short reddish brown "spines" and white "spines" in the apex. "flowers" deep pink with light pink margins. 25¢ to 50¢

Parthenocarpus: One would have to see these plants to appreciate them for they are hard to describe exactly when in flower. They are of a "green" body with sparse dark "spines". The "flowers" are of a delicate deep yellow "eye" with light "spines". "flowers" set off with a "red" stigma. 25¢ to 50¢

Parthenocarpus: Another of these "eye" plants. "spines" are green body covered with "white" "spines". "flowers" are "orange" tipped with red. A very handsome and desirable specimen. 25¢ to 50¢

HYGOCYTUS

Parthenocarpus: The "eye" is a remarkable feature that is often seen to form a or more heads that resemble the big round eyes. The "eye" is green and is covered with white spines with dark tips on the center. A free flower and very attractive. 25¢ to 50¢

ASTROCYTUS

Parthenocarpus: This is a very odd round "eye" with "green" "spines" that resemble the "eye" with its star shaped top dotted with "white" "spines". "flowers" are bright yellow with red throats. "flowers" also "spines". 25¢ to 50¢

Parthenocarpus: The "eye" is a remarkable feature that is often seen to form a or more heads that resemble the big round eyes. The "eye" is green and is covered with white spines with dark tips on the center. A free flower and very attractive. 25¢ to 50¢

Parthenocarpus: This "eye" and striking specimen is of a brownish green color. "flowers" are "white" star like. "spines" are "white" tipped with straight "spines" set in cottony "spines". "flowers" yellow with red throats. 25¢

Parthenocarpus: One of the more rare species that is similar to the "eye" except they have a soft spine that "eye" is round the "eye". "flowers" are red and yellow. 40¢ to 50¢

ECHINOEREUS

conglomeratus: A lovely cluster forming plant with sparse long spines. Flowers are of a lavenderish purple. 25¢

martinus: A light green body with short grayish white spines. Forms attractive large clusters. Flowers near the top, light yellow. 25¢

dasycanthus: The "rainbow cactus of the desert". A highly colored spiny species. Flowers are yellow. Well branched blooming size plants 75¢

reichenbachii: This is a very attractive species with a simple, globose to cylindric body, light green. The spines are shell white arranged in a lace like fashion on low ribs. Flowers are purple always opening in the morning and closing at night. Flowering sized branched plants 75¢

rigidissimus: Another of the "rainbow" species with spines arranged in layers of pinkish white and brownish white. A very attractive plant. Well branched ready to flower 75¢

APOCACAUTUS

flagelliformis: The "Rat tail" is a free blooming whip like bright green slender plant with short spines on very low ribs. Flowers are a delicate red and the plant blooms over a long period. 25¢ ea. Grafted on short stalks 75¢

BRITTONIA

davisii: An interesting plant with long red and yellow spines. The long central spine has a sharp hook. Flowers are of a lovely yellow. A good bloomer. 25¢

CARNEGIEA

gigantea: The "Saguaro" of our desert. Forms a giant tree like plant with great age. A very slow grower. 75¢

CEPHALOCEREUS

senilis: The hairy "Old Man" of the desert is one of the most popular species we have. Has long snow white hair that cover the plant from top to bottom. 35¢

paumeri: Very similar to the (COMETIES) but lacking as much hair. Plant is of a yellowish green. 50¢

chrysacanthus: The "Gold torch" is another very popular hairy species for the lovely golden spines and heavy wool like white hair. Makes a lovely show plant. 35¢

We have many species of the large tree cereus. The average list price is 20¢ for 2 to 4 in. plants. Cuts are 50¢ per foot. All cuts over one foot are F.O.B. our nursery.

CHAMPECEREUS

silvestrii: The ever popular "PEANUT CACTUS". This little gem is found in most all collections either grafted or on its own roots. The dark green body forms large clusters and is a splendid bloomer. Flowers are of a burnt red. 25¢ each. Grafted on short stalks 75¢

DOLICHOTHELE

sphaerica: This plant closely resembles a (MAMILLARIA) in form but it has quite large bright yellow flowers and longer bluish green nipples. In age they form large many headed clusters that are very attractive. Branched plants 50¢

CHRISTOCACTUS

baumanii: The "Scarlet bugler" is a must have. Has long bright red firecracker like flowers along the slender bright green stalks. Low ribbed with many brownish spines. 25¢ and 65¢

straussii: A rapid tall growing, free flowering white torch-like plant with low ribs and almost completely covered with white hair like bristles. Flowers long tubular red finger-like that never open very wide. Makes a striking show plant. 25¢

ECHINOPSIS

multiplax: This is one of the lovely "Easter Lilly" Cacti. Plants globular to somewhat clavate. Heavy broad ribs with yellowish white wool in the areols. Flowers are of a delicate rose. 1 to 1 1/2 in. plants 20¢ 3 to 4 in. plants flowering size 75¢

ESPOSTOA

lanata: The "Old Man of the Andies" is another very popular species. From high in the Andies they will stand a very low temperature without freezing. The bluish green body is completely covered with soft woolly hair. A rapid grower. 1 1/2 to 2 in. plants 30¢ 2 1/2 to 3 1/2 in. plants 65¢

ECHINOCACTUS

ingens: A very attractive fast growing plant that will make a lovely specimen in a short time. They will reach a height of 4 to 6 ft. and almost the same in diameter. Likes a rich well drained soil. 35¢

grusonii: This is one of the most striking plants I have ever seen. A deep bright green barrel like body with heavy ribs almost hidden with bright shiny golden spines. The crown is filled with a mass of golden wool. Flowers are a brilliant yellow cerise. 1 in. 25¢--1 1/2 in. 35¢ 2 1/2 to 3 1/2 in. \$1.75

PIPTANTHOCAERUS

We have many species of these interesting plants ranging from seedlings to quite large trees. Some are in monstrous forms. 2 to 3 in. seedlings 35¢ Monstrous forms 45¢ 8 to 12 in. cuts 75¢ 15 to 20 in. cuts \$1.35. All cuts are F.O.B. S.F.

PEROCACTUS

acanthodes: A joy to all when lightly sprinkled with water they turn a fiery red. The long hooked horny spines closely matted around the plant is responsible for this array of color. 25¢

TRICOCERUS

shafferi: Has fine whitish spines on low ribs. Tall growing bright green columns that bloom from the top. Flowers are 9 to 12 in. of a lovely white. 25¢

candicans, pasacana, telegonus: All are free flowering and easy to grow. Flowers are white. Give a rich well drained soil and part shade with plenty of water in the summer. 25¢

spachianus: This is one of the finest for grafting because of the heavy healthy quick growing stalks. Flowers 8 to 10 in. white. 1 to 1 1/2 in. 20¢ large clusters blooming size \$1.00

TOPHORA

williamsii: The "dope Cactus" is a very odd species, bluish green and spineless showing white dots of a papery hair-like bristle. Flowers are a lovely pink. 50¢

HELIOCEREUS

speciosus: One of the loveliest of the sun cereus. Has a bright red blossom that shades to a violet-purple in the throat. Treat this plant like an (EPIPHYLLUM) for best results. 50¢

HOMALOCEREUS

texensis: The "horse mainer" is an attractive plant, round and low to the ground, of a bronzy green color and having very stiff erect spines. Flowers are pink with pale yellow stamens. 2 to 3 in. plants 50¢ 3 to 4 in. plants 75¢

MELOCACTUS

intortus: This plant makes a truly unique specimen with a colorful woolly like fez set up on top of a bright green body with heavy ribs and stiff spines. The flowers are born out of the strange woolly fez. 2 to 3 in. plants 65¢

SILNICEREUS

Macdonaldiae: The "Queen of the night" is one of the largest flowers in the Cacti family. The shin vine like plants are easily trained on stakes. For best results keep them pot bound in a good rich sandy soil and apply plenty of water in the summer. Flowers measure 12 to 14 in. across, The extreme outer petals are chartrreuse, inner petals snow white and satiny. A beau ideal of a blossom. 12 in. cuts 50¢ blooming size \$1.00

ERIOEREUS

jusbertii: Another vine like species, easy to train and an excellent bloomer. The lovely white flowers open in the evening and close in the late morning. 6 to 8 in. 35¢

TEROCACTUS

glomeratus: A rare species from Argentina that is very popular and always in great demand. Globular deep green joints bearing soft paper like ribbons in place of spines. Forms large clumps and likes a rather dry soil. 50¢

turpinii: Similar to above but not as many spines. Spines are of a whiter hue. 50¢

We have many more species of Cacti that we are not listing here. If you are looking for any particular ones please ask and we will be glad to quote prices. We also have many large specimen sized plants as well as grafts and we will set up any species on grafts that you request that are not already in stock.

All specimen sized plants as well as large grafts are priced F.O.B. our nursery and will only be shipped Express collect.

SUCCULENTS

HAWORTHIA

cymbiformis: A very easy plant to grow and a real novelty with their windowed markings. 2 in. plants 25¢

retusa: Bright green windowed plant with short fat leaves. 2 in. plants 25¢

coarctata: Long deep green sharp pointed leaf with light warts. Makes a lovely tall specimen plant. 25¢

chätwinii: Light green long pointed leaf. The plant forms a tall pagoda shaped specimen. 25¢

margaritifera var. granata:

Deep green heavily warted with white warts around the leaf. Nice sized plants 25¢

radula: Deep dark green leaf with many tiny warts all over the long thin leaves. 40¢

attenuata: The "Zebra" plant. This lovely species is of a bright bluish green with white broken warts across the underside of the leaves only. 50¢

ARIORA pentagona: This is an interesting light yellowish green plant that resembles the (HAWORTHIA) somewhat but they have stiff, firm, horny leaves that are sharp pointed. 50¢

ANACAMPSEROS rufescens: Pagoda shaped plant with redish green short fat leaves. Long white hairs between. Flowers are lovely rose pink and quite large. 45¢

AICHRYSON domesticum var. variegatum A lovely bush type plant with green and white leaves. Flowers are golden. 25¢

CRASSULA

hemispherica: A lovely rosette like plant that has deep green closely packed leaves. 25¢

teres: The "Rattle snake" Crassula. A cluster forming closely packed leafy plant that has a regular white tassel for blooms. Found only in choice collections. 50¢

falcata: Long velvety inter-laying deep green leaves. Forms lovely bushy plants that are real hardy. Has bright red flowers that stand erect. 25¢

perforata: Bluish green chain like plant. Makes a lovely hanging basket. 15¢

SEDUM

morganum: Truly a very lovely bluish green hanging basket plant that is a prize in any collection. A must have. 50¢

We have many more Sedums at 15¢ per plant.

PACHYPHYTUM compactum: The "Tower of jewels" is a lovely little species with pointed fat bluish green leaves that show tips of white on redish brown. A real jewel. 20¢

KLEINIA tomentosa: The "Ghost plant". Lovely powdered white leaves on powdery white stems. A bush forming plant that shows off anywhere. 30¢

CEROPEGIA woodii: The "Heart vine". Just like the common name says, this lovely vine has reddish-green heart shaped leaves and deep purple umbrella shaped flowers. 15¢

STAPETIA

variegata: Long slender notched leaves of a bright green. Flowers are very strange both in color and odor. 35¢

gigantea: This is one of the largest flowering varieties in the SUCCULENT group. Has large 12 in. star shaped flowers of distinction. A must have. 50¢

comparabilis: Large coppery red flowers. 35¢

AGAVE victoria-reginae: A very lovely dwarfed variety with bluish green leaves that show white markings where the new leaves unfold. The spined tip has 2 teeth. 7 to 8 in. \$2.50

TITANOPSIS

astridae: "Jewel plants" and they surely are for their broad tipped leaves have little jewel like warts setting them off like no other plants. 50¢

primossii: Another "jewel". Has lovely yellow flowers. 50¢

pleiospiros neilii: The "Split rock". A smooth almost round deep dark green smooth leaf that splits and forms a new pair of leaves. Flowers are a bright orange-yellow shading to white at the base. Large plants 50¢

PAUCARIA tigrina: The "Tiger jaws" is a lovely bright green leaf with teeth along the edge. Flowers are large yellow. 25¢

ALOE variegata: The "Partridge brest". A remarkable mottled bluish green leaf with white and yellow stripe. Hang one up on a string in a dry place and watch it grow. 25¢

ADROMISCHUS

cristatus: A deep green velvety leaf with crinkley edges. A easy fast grower. 25¢

mammillaris: Short fat closely packed whitish green leaf with flecks of brown. 20¢

POELENITZIANUS: Another closely packed, flecked leaf but flat and rounded. 20¢

ECHIVERIA

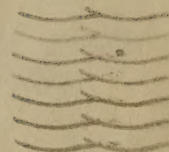

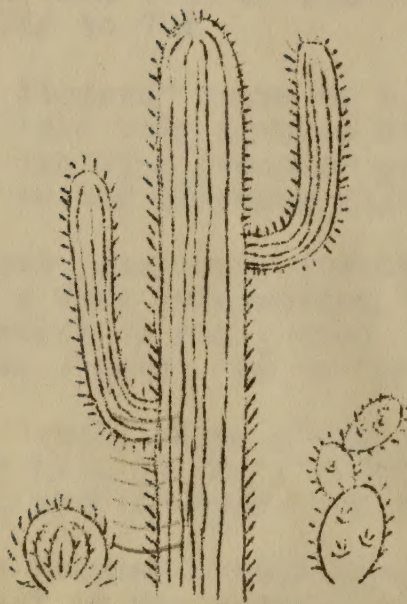

elegans: A lovely white rosette. Small 2 in. 15¢ large 25¢

gilva: Thick pale green leaves that turn bright red in the sun. Small plants 15¢ large size 25¢

Hoveyi: A truly lovely specimen. Almost a pure white, long narrow leaf with stripes of green. Shows a trace of red when placed in the sun. Nice sized plants 50¢

derenbergii: A very pretty green rosette with bright red tipped leaves. A very good bloomer and a real beauty. 30¢

We have many more SUCCULENTS that we will be glad to quote prices on for the asking.
